PROFESSIONAL SUMMARY

IT Project Manager with 6+ years delivering technology projects across large-scale, regulated environments. Managed 4 concurrent workstreams to 95% on-time delivery with zero critical defects. Turned a 3-day manual reporting cycle into same-day visibility, improved data accuracy by 60%, and took referral conversion from 1.6% to 18.5%, contributing EUR 1.4M+ quarterly. Delivered an AI automation that cut 40% of manual effort, CEO-endorsed for board-level rollout. Experienced working across geographically distributed teams and mentoring junior team members. PMP certified. Agile and Waterfall. MSc Business Analytics, University of Galway (2025).

SKILLS & TOOLS

Project Management: PMP • Agile and Scrum • Waterfall • workstream management • project planning and scheduling • risk and issue management • change management • budget tracking • vendor management • stakeholder governance

Microsoft 365 and Power Platform: SharePoint • Microsoft Teams • Power BI (DAX, Power Query) • Power Automate • Excel advanced • M365 administration • project reporting and dashboards

Delivery and Governance: Jira • Confluence • project documentation and reporting • ICT governance • GDPR awareness • requirements management • Agile ceremonies facilitation • business case development

CERTIFICATIONS

PMP, PMI | CSPO, Scrum Alliance | Atlassian Agile PM Professional | AWS Cloud Practitioner | Power BI, DataCamp | Salesforce CRM | ASPIRE Award 2022 (Top Performer)

EDUCATION

University of Galway

MSc in Business Analytics

Galway, Ireland

2024 – 2025

Modules: Data Analytics | Statistical Modelling | Machine Learning | AI and Decision Theory | Business Modelling | Data Visualisation | Python and R

Rajasthan Technical University

B.E. Mechanical Engineering

India | 2014 – 2018

WORK EXPERIENCE

Applegreen

Operations Supervisor

Dunshaughlin, Co. Meath

August 2025 – May 2026

- Supervised daily retail and forecourt operations, maintained HACCP compliance and food safety standards, and ensured the site met all regulatory requirements across each shift.
- Trained and supervised a team of 8, ran daily briefings, covered onboarding for new staff, and flagged performance issues early so they were resolved before they affected the floor.
- Built standardised shift reports and operational checklists so handovers were consistent, issues were logged clearly, and nothing fell through between shifts.

upGrad

IT Project Manager

Noida, India

July 2020 – July 2024

- Managed 4 concurrent workstreams across Sales, Finance, Operations, and Marketing. Ran Agile ceremonies, maintained the Jira backlog, tracked delivery against plan, and kept stakeholders informed at every stage. 95% on-time, zero critical defects.
- Stakeholders were working off 12+ manual reports that took 3 days each and gave different answers. Defined KPIs with each team, built 8 Power BI dashboards on a single clean data source, and got reporting to same-day. Data accuracy improved 60%.
- Spotted where conversion was being lost in the referral funnel, put together a clear recommendation, and coordinated with the commercial team to act on it. Referral conversion went from 1.6% to 18.5%, contributing EUR 1.4M+ quarterly.
- Managed vendor relationships and coordinated with internal IT and external partners on system integrations. Tracked budgets, flagged risks early, and escalated blockers with clear options for resolution.
- Worked across teams in India, the US, and the Middle East, adapted communication and reporting to suit different time zones and stakeholder expectations, and mentored two junior analysts through to independent delivery.
- Mapped current and future-state processes with business users, took an AI automation from pilot to production, and presented the business case for board-level rollout. CEO-endorsed. Cut 40% of manual operational effort. ASPIRE Award 2022.

Think and Learn Pvt. Ltd.

Business Analyst

Jaipur, India

March 2019 – January 2020

- Worked with product and commercial teams across 3 product areas to define what good looked like, built reports around the decisions they actually needed to make, and put validation checks in place for recurring data quality issues.

- Analysed customer and operational data, found where performance was falling short and why, and presented the findings with clear recommendations to the commercial team. 17% improvement across tracked areas.
- Tracked KPIs daily across all 3 product areas, flagged drops early, and coordinated with the team to trace and fix the root cause before they became bigger problems.

Ashok Leyland (OEM Manufacturing, Regulated, Multi-Site)

Business Analyst

Udaipur, India

March 2018 – February 2019

- Analysed data across 3 regulated manufacturing sites, found a 35% cross-site discrepancy that was affecting business decisions, identified the root cause, and worked with the team to fix it. Data accuracy improved by 22%.
- Built weekly performance reports and data summaries for senior leadership, giving a clear view of what was happening across all 3 sites so decisions were based on reliable numbers.
- Documented business processes, mapped data flows across sites, and maintained the reporting baseline used by senior leadership for operational and commercial planning.

PROJECT EXPERIENCE

IT Reporting Programme upGrad | Power BI | Power Automate | SharePoint | DAX | SQL

The problem: 12+ manual reports produced weekly, each taking days, using different data sources that gave different answers to the same question.

- Mapped existing reports, owners, and data sources to understand the full picture. Defined requirements with stakeholders across 4 departments, managed delivery through Agile sprints, and coordinated QA sign-off.
- Replaced the manual reporting cycle with 8 connected Power BI dashboards and Power Automate workflows on a single validated data source. Reporting moved from 3 days to same-day. Data accuracy improved 60%.

AI Automation Delivery upGrad | OpenAI API | Process Mapping | Change Management | Stakeholder Governance

The problem: Repetitive operational tasks were consuming staff time that could not be spent on actual analysis or delivery work.

- Ran process mapping workshops with business users, built the business case, and managed delivery from pilot through to production. Coordinated cross-functional sign-off and governance at each stage.
- Presented the results to the CEO, who endorsed board-level expansion. Cut 40% of manual operational effort. Received the ASPIRE Award (Top Performer) for this delivery.

MSc Capstone Project: Airfare Pricing Prediction - Python | Machine Learning | XGBoost | 90%+ R^2 | github.com/vish1506jeet

Delivered end to end as a solo project, scoped the problem, sourced and cleaned the data, built and validated the models, and published the full methodology and code on GitHub. 90%+ prediction accuracy.
